

Create HTML Pages

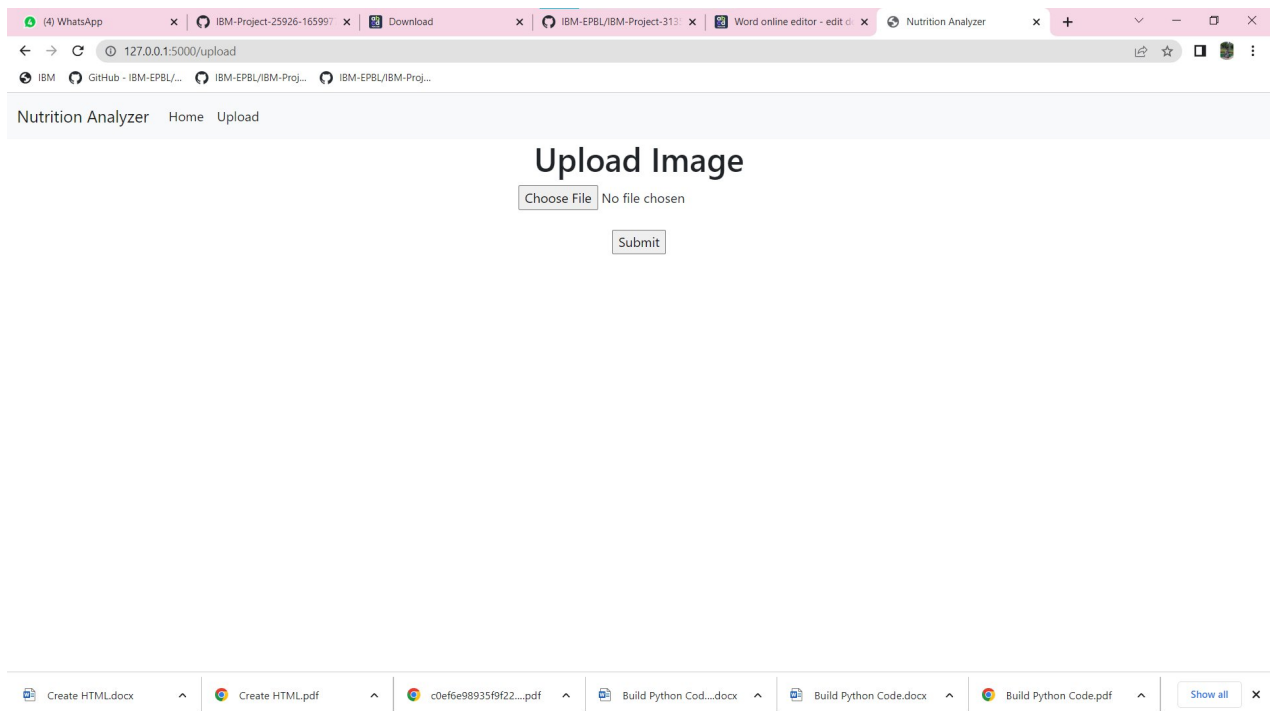

Assignment Date	24 November 2022
Team ID	PNT2022TMID29934
Project Name	AI-Powered Nutrition Analyzer For Fitness Enthusiasts

- We use HTML to create the front-end part of the web page.
- Here, we have created 4 HTML pages-
base.html, upload.html, index.html, value.html
- base.html displays the home page.
- upload.html is used for uploading the image
- value.html will showcase the output
- index.html is to showcase the result.

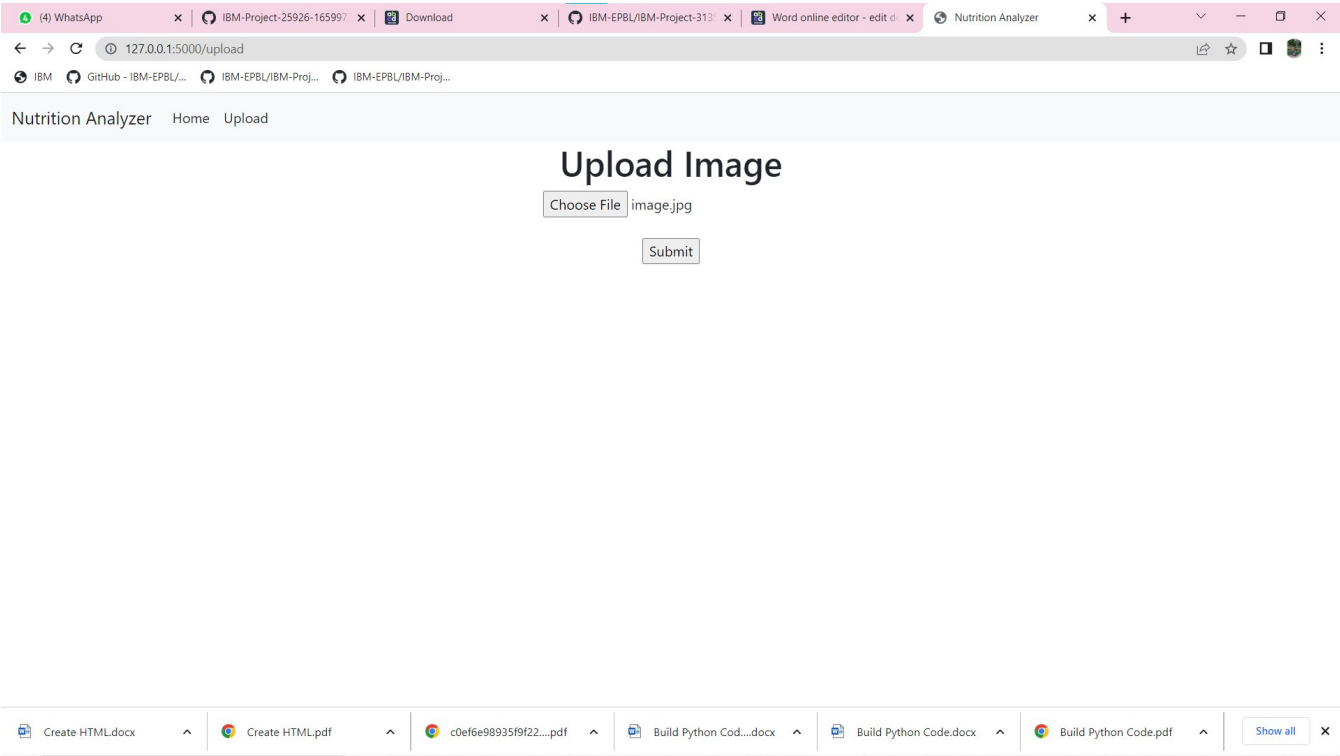

base.html looks like this

index.html

upload.html

Value.html
